Jackpot

You may do the jackpot at any time, before or after the buzzer. If you do obstacles 1-3 you receive 15 points, if you continue on to obstacle 4 you will instead receive 20, and if you stay behind the line while you do obstacle #5, this will be increased to 25 points. If you fault the gamble, you will be awarded normal point values for the obstacles - you may retry the gamble in this case, but bars will not be reset.

Once you have completed a gamble, the obstacle point values return to normal values and you will not be awarded gamble points a second time.

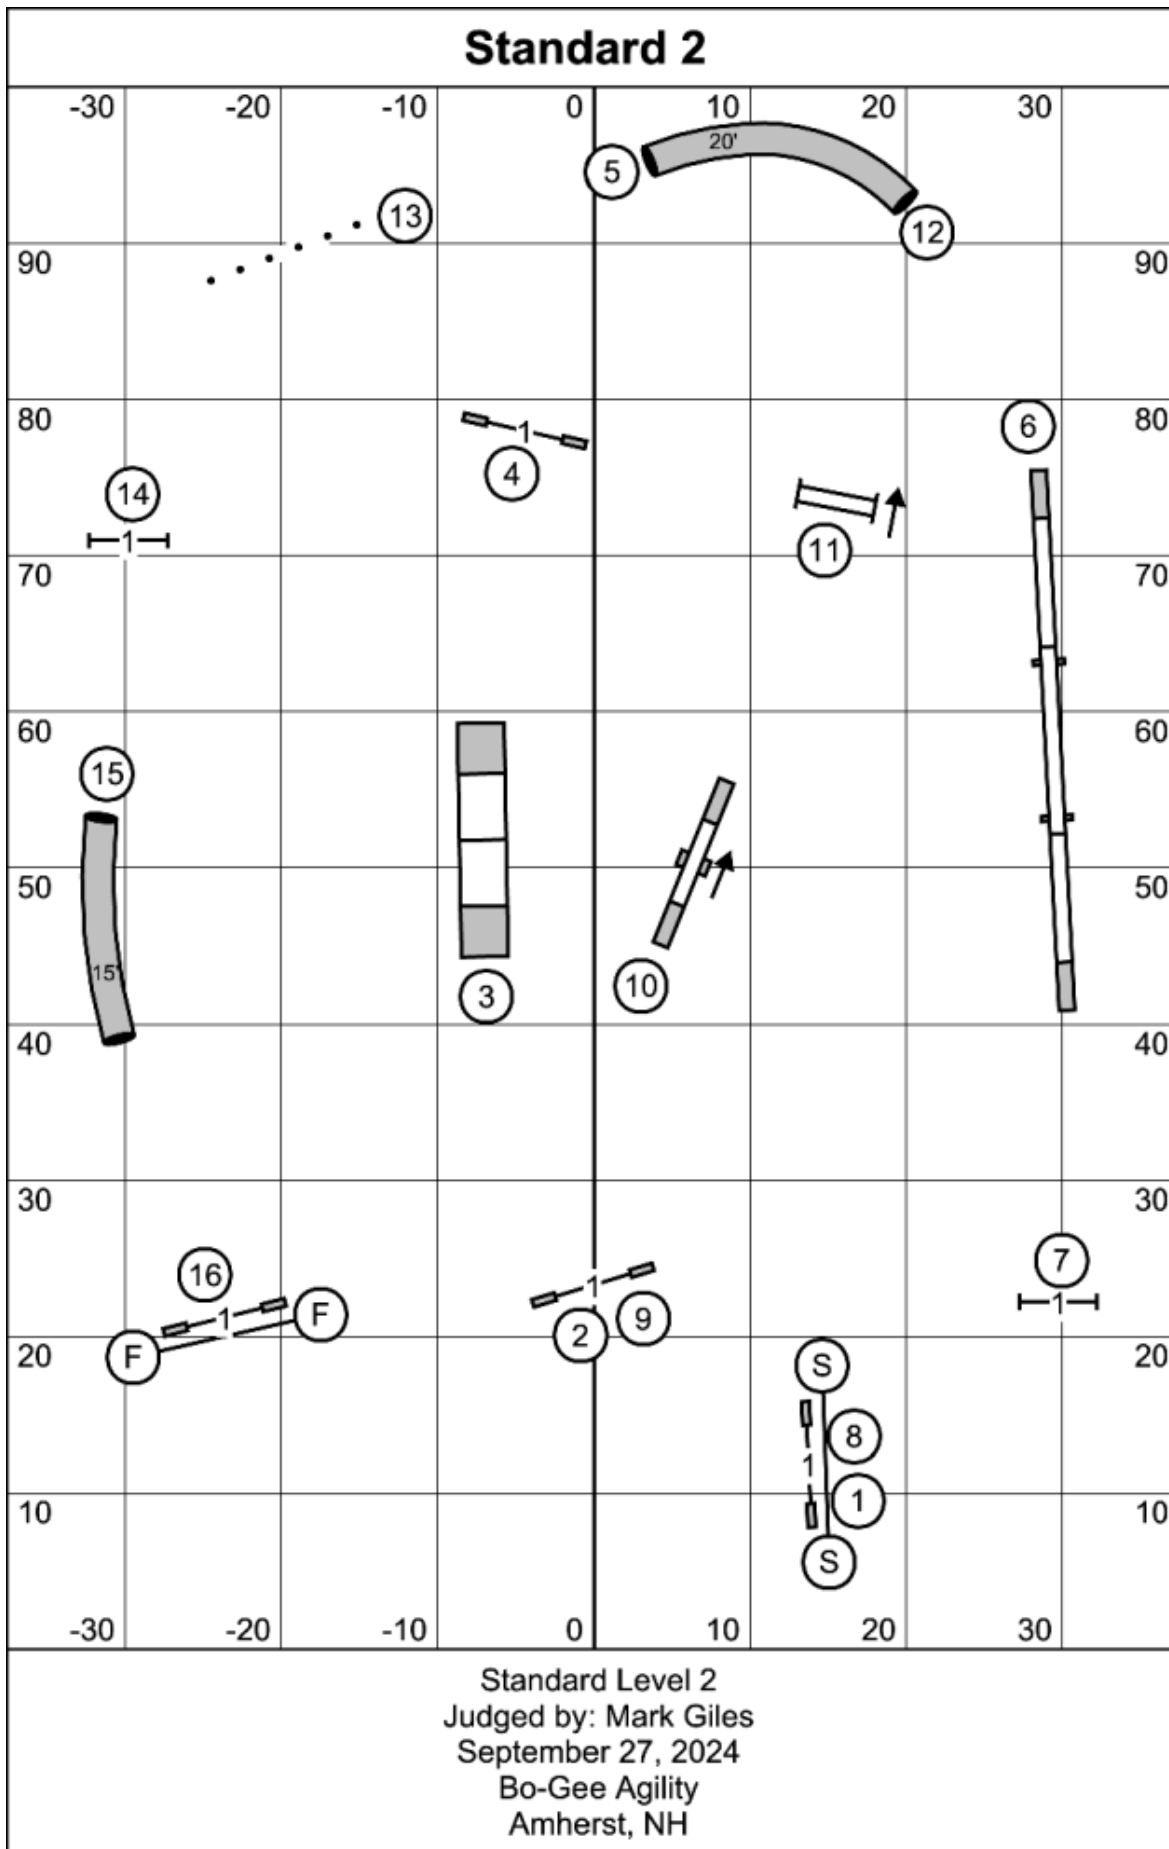

You must do at least the 15 point obstacle and have enough points for your level within game time to qualify.

Table is live after the first buzzer and is worth 5 points.
