

## Jackpot Levels 1 2 3 5 C

Each gamble is worth 20 points.  
Only need to do one (1)  
of the gambles to Q.

All obstacles may be taken twice for points, taking the A-frame back to back is okay if completed safely. Combo must be in flow.

The gamble may be taken at any time during the run. The finish jump is not live until you hear the first horn. If your dog takes the #2 or A jump that will be considered your attempt at that gamble, so you must continue the jumps to complete that gamble. You cannot do any 2 gamble obstacles in a row unless you are doing the gamble. If the #2 or A jump is dropped, that gamble is negated. If the dog takes the first gamble jump in the wrong direction, you have not started so turn your dog around and take the jump in the correct direction and complete the gamble. Once you have taken the gamble, you can take the obstacles again twice more for points. When you hear the horn proceed to the finish jump, you can collect points on the way. The gamble is complete when you take finish jump after the first horn. It is bi-directional, dropping the bar is okay because it is not worth points, it just stops the time. Always take the finish jump, you might have Qd but you don't get your points until you take that jump.
