To do the gamble, the handler will need to enter at least three of the four gamble boxes at any time during the game.

While in the box you will need to complete at least 1 obstacle successfully in each of the three boxes chosen before moving to the table to stop the clock.

The gamble will be the first obstacle completed when the handler steps in a box. The Gamble will be counted out as "A or B" and count for 20 of the required points when three are done. If all four boxes are done you will receive 10 extra points! You can still accumulate points after the horn

However going over total game time will result in an NQ. Table is not live until after the whistle/horn or if the dog is directed to it.
