## SNOOKER 12

Start line is NOT bidirectional.

In the opening, the objective is to successfully take a red jump (1 point) followed by a color of your choice. Repeat this process three times total, each time using a different red. Colors can be repeated 1, 2, or 3 times. Fourth red is on the course only if a bar is dropped. All obstacles are multi-directional in the opening, as marked in the closing with Jump 2 bidirectional. In the opening, if a combo is done, all parts must be completed even if the first part of the combo is faulted. Failure to do so will result in the end of your run. Combos may be done in any fashion, they do not have to be in flow, however, once you start the tunnel in one direction you must complete it in that direction. If you do #2 as your last color, you must repeat 2 again to start the closing. A bar down in the opening of a colored obstacle, scores a zero in the opening. It remains down in the closing, scoring a zero as long as the dog goes between the uprights. Failure to do so ends the run. If you hear judge's whistle/thank you, or the timer's buzzer, go to the finish jump BEFORE you touch your dog to get a time, otherwise it is an NT.

Finish jump is not live until you finish your opening. The finish jump is bidirectional, and your time is not dependent upon the jump staying up.

Game time:  
 Small dogs - 55 sec  
 Large dogs - 50 sec

Qualifying points:  
 Level 1 26 points  
 Level 2 28 points

Enthusiast/Specialist 2 points less.
