Jackpot

You may do the jackpot at any time, before or after the buzzer. If you do obstacles 1-3 while staying behind the dashed line you receive 15 points. After obstacle 3 is done, the gamble line shifts to the outer (dotted) line. If you continue on to obstacle 4 you will instead receive 20, and if you stay behind the line while you do obstacle #5, this will be increased to 25 points. If you fault the gamble, you will be awarded normal point values for successfully completed obstacles - you may retry the gamble in this case, but bars will not be reset.

Once you receive gamble points for any gamble, you may **not** retry again to try to receive a higher point total. The obstacle point values return to normal values and you will not be awarded gamble points a second time.

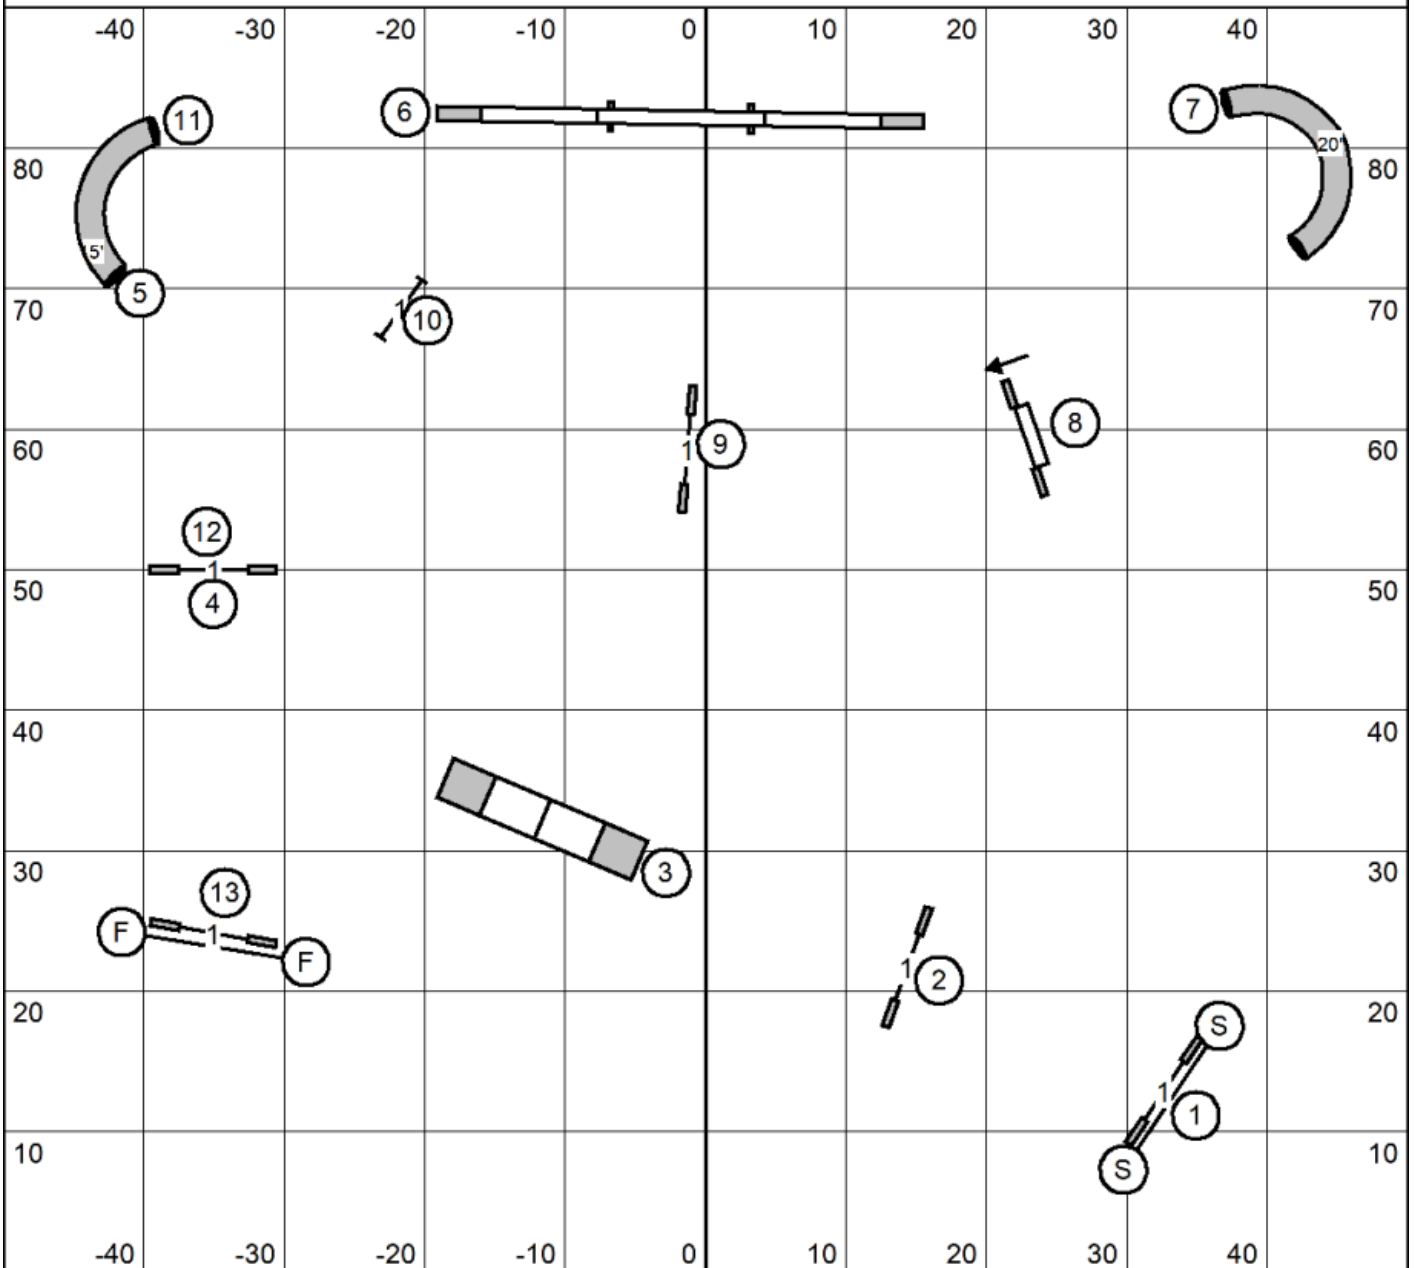

Each obstacle can be done two times for points, not including the gamble performance (so gamble obstacles can be done once as part of the gamble and two times as individual obstacles).

You must do at least the 15 point gamble and have enough points for your level within game time to qualify.

The finish jump is live after the first buzzer and is worth 5 points (before the buzzer it is worth 1 point).
